EL SOBRANTE, CA 94803

Secretary  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

████████████████████

The Secretary,

Dec. 6, 1999

I've heard you intend to sell metal and other materials, which are contaminated with radioactivity, to recyclers. This could expose people to dangerous radiation, from buyers all the way to consumers. I object to this proposal because it is a threat to people and the environment by possible loss of control of the substances.. If you approve this hazardous idea you must be certain that the materials are clearly labeled as hazardous throughout the entire process.

Sincerely,

PDR PR 20 64FR 35090
