Subject: Nuclear Waste to Cookware?

DOCKETED
12/17/99

'99 DEC 17 P2:50

Hello,

I received an email about a supposed proposal to use nuclear waste in consumer items. This is such a ludicrous proposal that I assume it must be another internet hoax. Certainly, no one in their right mind would ever propose or support such a thing. Please let me know that this is a hoax. Also, I would recommend that you list this on one or more of the internet hoax sites such as <http://www.europe.datafellows.com/news/hoax.htm>.

If, by any chance this is for real, I am utterly and completely opposed to it.

Thank you.
