RE: TURNING NUCLEAR WASTE INTO HOUSEHOLD ITEMS
DATE: 12/17/99

Now, this is the most ridiculous, unbelievable, irresponsible proposal I think I have ever heard. Who do you guys think you are? Do you have no humanity left in you?

I, for one, do not support any form of use of metals or other materials previously used in any way in connection with nuclear energy for public contact. I am willing to receive ZERO, NADA, ZIP amounts radiation so that others can save money from having to deal with it responsibly.

I do not support nuclear power and weapons wastes "released," "cleared," "deregulated," "exempted," "generally licensed," designated "de minimis," "unimportant" or BRC -- below regulatory concern -- or by any other means allowed out of nuclear facilities and into the marketplace or the environment, at any level.

And I will contact the media and notify all my friends about this so they can meet the public hearing deadline.
