Dear Friends:

I write to urge you to ~~do all in your~~ power to prevent the dissemination of radioactive wastes into general commerce--as is your statutory and moral responsibility. After all, aren't you the Nuclear REGULATORY Commission and not the Nuclear DISSEMINATION Commission?

The fact that it is difficult and expensive to monitor and protect radioactive waste does not justify its release, and the consequent jeopardizing of the lives and health of countless U.S. and global citizens.

I am writing on behalf of millions of householders, most of whom do not have time or resources to closely monitor what you and the nuclear industry are doing, to demand that you not allow the recycling of radioactive waste into household products!

Sincerely yours,

Dr. Douglas E. Wingeier
