PROPOSED RULE **PR 20**  
(64FR35090)

303

December 20, 1999

DOCKETED  
USNRC

NRC Commissioners

'99 DEC 20 P3:36

Re: Release of Solid Materials

You apparent willingness to release radioactive materials for incorporation into consumer and industrial products has received little attention in the press and I am only now aware of the issue.

I would ask you to:

1. Delay your decision on this for at least 8 months as requested by Public Citizen.
2. Give the matter the publicity it deserves so that more of us can become knowledgeable.

It is my position that you should contain and isolate; not release and pollute. I am sure the vast majority would agree with them.

The NRC is supposed to protect our safety but it frequently appears your mission is to protect nuclear industry profits.

Thanks you
