NRC Chairman Richard Meserve
Att. Rulemaking and Adjudications Staff
U.S. NRC
Washington DC 20555

Dear Chairman Meserve

I am writing to remind you that ^{the} radiation recycling of radioactive wastes will expose our descendants to unavoidable risk of genetic damage and disease ~~due~~ to release of artificial radionuclides

There is irrefutable evidence that by selling low level radioactive waste rather than treating it as the nuclear waste that it is, the nuclear industry is trying to make money at the expense of the public's health and safety. Even low level exposure to radioactive wastes can cause neurological problems and interfere with the body's immune system

Certainly the steel manufacturing companies don't want this, and I don't either.

Sincerely

Rhon Balman
