Dear Chairman Richard Meserve,
RE: SCOPING FOR THE NRC'S release from control policy/64 FR 125,
35090, 6/30/99

I am opposed to any recycling of radioactive contaminated materials, since recycling will result in the release and exposure of radiation. Please protect my health and other citizens' health. We do not need any extra exposure to radiation no matter how minute. Both my parents died of cancer and my oldest brother was operated on cancer last week. It's impossible to point a finger at causes for these cancers but I'm very concerned that our environment has a big influence, and that we must minimize our exposure to all toxins, which include radiation.

There is no safe level of radiation!!

Sincerely

Dini Schut
