Subject: disposal of solid materials from radioactive sites

DOCKETED
USMRC

'99 DEC 20 A11:04

I am writing to comment on the plans to establish guidelines for the disposal of solid materials from sites that work with radioactive substances. I would like the guidelines to be very strict and only permit disposal of any substance that is radioactive in any level in a radioactive waste storage facility. I do not want a level of radioactivity to be determined safe enough to permit release of the substance to a place where it cannot be tracked.
