To: NRC Chairman Richard Meserve:  
ATTN: Rulemaking and Adjudications Staff, U.S. NRC, Wash. D.C.

OFFICE  
OF  
ADJUDICATIONS

I really can't believe the NRC could possibly be proposing to mix and mingle even mildly radioactive metal and other materials into scrap which would go into products used by the public. I hear that you are going to approve this. As a very concerned citizen, I BEG of you not to do this absolutely frightening thing.

Sincerely yours,

Al Hester
