DOCKETED
12/20/99

'99 DEC 21 A7:21

Hello,

I read an article in the Atlanta Constitution that upsets me greatly. That is the article about the NRC Commission and the Department of Energy selling radioactive metals to the scrap metal industry. Although it is good to try and find uses for the used material I believe this is not acceptable for the benefit of all mankind and they many uses planned for it. But it is important to keep trying to find a use for the disposal of the product.

Please consider this a NO on this topic by a voter.

Thank You for your time,

Catherine G. Lind
