For the sake of the general public and future generations (if there will be any), I implore you to reconsider recycling radioactive contaminated metals. These items should be isolated and carefully contained indefinitely. The potential is too great for future disaster. I am not an alarmist, nor an activist, just a concerned citizen who wishes to see future generations live a happy and healthy existence. This is not a decision to be made quickly and without a tremendous amount of forethought! I am certain that you have families of your own that would be affected by the repercussions of your actions. Think about it!
