Suspicious Device - a package, object or item that is suspected to contain explosive materials or other hazardous compounds capable of producing injury or death to personnel or damage to the environment, facilities, or equipment.

Tabletop Drill - an emergency preparedness training activity which takes place in a classroom environment. Emergency response personnel are presented with simulated events and the players talk through the response actions. A tabletop uses a discussion format to provide training, development, and team building.

FC1> Technical Support Center (TSC) - a designated on-site facility that serves as a work area for use by the technical and management personnel in order to provide technical support to the EOC and field personnel. The WVDP TSC is located in the Administrative Complex (Annex) in Trailer 44, adjacent to the EOC.

FC1> Termination - a point at which the ED, in consultation with the DOE-PD, determines that the incident scene is stable, an approved recovery plan outline is in place, and no further emergency response is required. Termination also includes all notifications to responders or off-site agencies as required per site procedures.

Threat - an expression of intention to inflict injury or damage, received from any source.

Threshold Limit Value - Time-Weighted Average (TLV-TWA) - the concentration of hazardous materials for a normal 8-hour work day and a 40 hour work week to which nearly all workers may be exposed day after day without adverse effect.

Timely - means fast enough for response activities to be effective in protecting worker and public health and safety.

FC1> Timely Notification Officer (TNO) - the individual whose responsibility is to perform the initial call in the Timely Notification Process when directed by the IC.

FC1> Timely Notification Process - a timely, reliable, and accurate information management process which has provisions in place for prompt initial notification of workers, emergency response organizations personnel, including predesignated DOE elements and other Federal, state and local organizations. At WVDP, this is a fifteen minute process that starts when the IC categorizes an emergency and is conducted by the TNO.

FC1>

Weakness - a finding that indicates an inability to meet evaluation criteria which degrades the demonstration of a standard.

West Valley Nuclear Services (WVNS) - the prime contractor for the WVDP, a subsidiary of the Westinghouse Electric Corporation.

FC1> West Valley Volunteer Hose Company (WVVHC) - the primary fire fighting organization to respond to fire and medical emergencies at WVDP. WVVHC has fire stations located in West Valley and Ashford, New York.
