OFFICE OF THE
REGULATORY
ADJUTANT GENERAL

To the Commissioners on the NRC -

5/1/00

Recycle radioactive scrap metal into car parts, cookware, & toys? YOU HAVE GOT TO BE KIDDING! There is no consensus on what safe levels of radiation might be - I don't want irradiated food, for Pete's sake! Please set ^{radiation} standards for recycled radioactive waste at the level of zero tolerance, the only acceptable option.
