IV. SPECIFIC INTERROGATORIES

A. Contention 4: "Undue and Unnecessary Risk to Worker and Public Health and Safety"

1. Define "administrative control." Make specific reference to all documents, records, statements or sources which support your definition.

2. Define "physical protection." Make specific reference to all documents, records, statements or sources which support your definition.

3. Define "configuration." Make specific reference to all documents, records, statements or sources which support your definition.

4. Specify the basis, including all facts and circumstances, for your position that the licensee has a history of not being able to adhere to administrative controls with respect to the spent fuel pool (SFP) configuration. Make specific reference to all relevant incidents, documents, records, statements, or other sources which support your position.

B. Contention 5: "Significant Increase in Probability of Criticality Accident"

1. Specify the basis, including all facts and circumstances, for your statement that the applicant's evaluation demonstrates that a single movement error can result in criticality unless there is soluble boron in the SFP water. (Tr. at 107). Make specific reference to all documents, records, statements or sources which support your position.

2. Define "misposition." Make specific reference to all documents, records, statements or sources which support your definition.

3. Identify any and all actual mispositionings or misplacements of fuel assemblies at SFPs which have gone undetected, and please identify your basis for concluding there is a nexus between any or all actual mispositionings and an increase in the probability of a criticality accident at the Millstone Unit 3 SFP. Make specific reference to all documents, records, statements or sources which support your position.

4. Identify any and all actual mispositionings or misplacements of fuel assemblies in SFPs which have resulted in criticality. Make specific reference to all documents, records, statements or sources which relate to your answer.

5. Identify any and all boron dilution or boron loss events which have resulted in criticality in SFPs. Make specific reference to all documents, records, statements or sources which relate to your answer.

6. Identify the boron loss event cited on page 100 of the prehearing conference transcript, as to name of plant and date. Specify the cause, the amount of boron lost, the duration of the event, the actions taken and the result. Make specific reference to all documents, records, statements or sources which relate to your answer.

C. Contention 6: "Proposed Criticality Control Measures Would Violate NRC Regulations"

1. Specify the basis, including all facts and circumstances, for your position that credit for administrative measures is not permitted under General Design Criterion (GDC) 62 for the prevention of criticality (Tr. at 134). Make specific reference, including pinpoint citations to particular page numbers where applicable, to all documents, records, statements or sources which support your position.

2. Explain, in detail and with reference to specific examples, your position that there are two classes of administrative measures: "those that are made over a finite time and after having been made are no longer necessary;" and "administrative measures that are required on an ongoing basis." (Tr. at 139). Make specific reference, including

pinpoint citations to particular page numbers where applicable, to all documents, records, statements or sources which support your position.

3. Specify the basis, including all facts and circumstances, for your position that only those administrative measures "that are made over a finite time and after having been made are no longer necessary" are permissible under GDC 62 for the prevention of criticality.

V. EXPERTS

1. Identify each and every expert who will provide sworn affidavits or declarations for the written filing for the Subpart K proceeding , including each expert's name, affiliation, business address and telephone number.

2. For each expert named in the answer to General Interrogatory 1 , state (a) the subject matter and substance of his/her testimony, (b) the facts and opinions upon which that testimony will be based, (c) the grounds for each opinion, and (d) any authorities and/or treatises upon which the expert relies.

Specify (a) the date of the interview; (b) where the interview occurred; (c) who was present during the interview; (d) whether the interview was recorded or reduced to writing, including notes; (e) who is in possession of the recording or writing; and (f) the substance of the interview.

VII. GENERAL DOCUMENT PRODUCTION REQUESTS

1. For each expert named in the answer to General Interrogatory 1, a complete copy of his/her *curriculum vitae*, resume or professional qualifications.

2. All expert reports, including all data, authorities and treatises relied upon in preparing the report. Specify whether each report or treatise was subject to peer review.

3. The Staff requests that CCAM and CAM produce all documents requested by, and provided to the Applicant pursuant to Northeast Nuclear Energy Company's First Set of Interrogatories and Requests for Production of Documents Directed to Connecticut Coalition Against Millstone and Long Island Coalition Against Millstone.

VII. SPECIFIC DOCUMENT PRODUCTION REQUESTS

A. Contention 4: "Undue and Unnecessary Risk to Worker and Public Health and Safety"

4. All documents that relate to the basis for your assumption that the boron concentration level in the spent fuel pool could drop. (Tr. at 106).

5. All documents demonstrating that "the history of the industry does support that there is . . . a likelihood of a misplacement of more than one fuel assembly." (Tr. at 119).

6. All records that include reports of misloaded fuel assemblies. (Tr. at 106).

7. All documents supporting your statement that "there is a rather dismal history of mispositioning fresh fuel assemblies in the spent fuel pools." (Tr. at 108).
