SUBJECT: PROPOSED IMPORT OF RADIOACTIVE DEPLETED URANIUM  
TURNINGS; DEPLETED URANIUM CYLINDRICAL PIECES, AND  
CONTAMINATED OIL FROM THE UNITED KINGDOM  
(APPLICATION NO. IW008)

Dear Mr. Hauber:

Starmet CMI provides the following additional information concerning the above  
referenced Import Application.

1. The proposed shipping schedule for this material is the first shipment to be received at the CMI facility in May 2000. Shipments will then occur over a four-year period that would result in a final shipment date of May 2004.
2. The material will be transported by ship to the Port of Charleston, and trucked from the port to the CMI facility.
3. The depleted uranium will be converted into oxide and used for radiation shielding products. The oil used for packaging of the uranium material will be incinerated at a radioactive waste processor; GTS Duratek or DSSI located in Oak Ridge, Tennessee. No other waste stream would be generated.

Starmet CMI has requested and received approval from the South Carolina Department of Health & Environmental Control Department to receive and process this material.

If you have any questions or require any additional information, please contact me at 803-259-2321.

Sincerely,

STARMET CMI
