Supplement 4 to License Amendment Request 00-01, "Administrative Revisions to the Improved Technical Specifications"

Dear Commissioners and Staff:

On March 16, 2000, PG&E submitted License Amendment Request (LAR) 00-01 in PG&E letter DCL-00-041. This LAR requested various changes to correct errors identified during the implementation of the Improved Technical Specifications (ITS) issued in License Amendments 135 and 135 for Units 1 and 2, respectively. On April 11, 2000, April 19, 2000, and June 2, 2000, PG&E submitted supplements to LAR 00-01 in PG&E Letters DCL-00-056, DCL-00-060, and DCL-00-085, respectively.

As a result of additional conversations with the NRC during the review of LAR 00-01 and supplement 3, PG&E agreed that one additional proposed change in LAR 00-01 required additional justification via the standard technical specification change process since it was not a change consistent with NUREG-1431. This change is not required for implementation of the ITS. Consequently, to expedite the review of the other changes proposed in LAR 00-01, PG&E withdraws the deletion of Surveillance Requirement (SR) 3.3.1.10 from Function 16.b in change A.3.b of LAR 00-01. PG&E may pursue the deletion of SR 3.3.1.10 from Function 16.b of TS 3.3.1, Table 3.3.1-1 in a future LAR.

The change included in this supplement does not affect the conclusions or no significant hazards consideration of LAR 00-01.

A001

Sincerely,

A handwritten signature in black ink, appearing to read "D. H. Oatley". The signature is fluid and cursive, with the first letters of each name being capitalized and prominent.
