## UNITED STATES OF AMERICA NUCLEAR REGULATORY COMMISSION

## Before the Atomic Safety and Licensing Board

In the Matter of CAROLINA POWER & LIGHT COMPANY

(Shearon Harris Nuclear Power Plant) Docket No. 50-400-LA

ASLBP No. 99-762-02-LA

DEPOSITION OF GORDON THOMPSON, PH.D.

At Raleigh, North Carolina October 21, 1999 9:40 AM to 4:14 PM Reported by: Melody L. Rife, RPR

1	GORDON THOMPSON, PH.D. PAGE 9
2	
3	Thereupon, the following proceedings
4	were had:
5	* * * * *
6	(Thereupon, a discussion was held off
7	the record)
8	DR. HOLLAWAY: I also ask that you
9	transcribe everything during the
10	deposition, except during breaks and when
11	we go off the record, when nothing should
12	be transcribed. And please interrupt, if
13	it's necessary, to clear up any doubt
14	about a question or answer.
15	THE COURT REPORTER: Thank you.
16	DR. HOLLAWAY: I'd like you to mark
17	exhibits prior to commencing examination,
18	so we have that clear.
19	(Thereupon, a discussion was held off
20	the record)
21	* * * * *
22	Thereupon,
23	GORDON THOMPSON, PH.D.
24	having first been duly sworn, was examined and
25	testified as follows:
	· · ·

.

1	GORD	ON THOMPSON, PH.D.	PAGE	20
2				
3	Α.	Right.		
4	Q.	Do you agree with the findings of	this	
5		book?		
6	Α.	I find it a generally useful book	that I	
7		found to contain generally accurat	e	
8		information. I would not necessar	ily	
9		support all of the findings and		
10		recommendations.		
11	Q.	Any findings or recommendations th	at you	
12		know of that you don't agree with	in	
13		Mr. Lochbaum's book?		
14	Α.	I don't recall any at present.		
15		DR. HOLLAWAY: I'll ask the c	ourt	
16		reporter to mark as Exhibit 2 the		
17		curriculum vitae of Gordon R. Thom	pson	
18		dated July 1999.		
19		(Thereupon, Thompson Exhibit	No. 2	
20		was marked for identification	)	
21	Q.	Dr. Thompson, have you seen this d	ocument	5
22		before?		
23	A.	I wrote it.		
24	Q.	So you authored this.		
25	A.	Yes.		
		•		

ł

1	GORD	ON THOMPSON, PH.D.	PAGE	21
2				
3	Q.	Are the statements in here truthful	1?	
4	A.	Yes.		
5	Q.	This states that you have a Ph.D. :	in	
6		applied mathematics?		
7	Α.	Correct.		
8	Q.	What does that relate to?		
9	Α.	The work was in the the theory of	of	
10		high-temperature plasmas. So it co	ould be	э
11		considered theoretical physics, but	t it	
12		happened to be done through the mat	th	
13		faculty.		
14	Q.	Can you tell me what courses you ha	ave	
15		taken in fission reactor engineer?		
16	Α.	None.		
17	Q.	Can you tell me what courses you've	e taker	n
18		in fission reactor criticality cont	trol?	
19	A.	None.		
20	Q.	Okay. What training have you had :	in	
21		fission reactor criticality analys:	is?	
22	A.	None.		
23	Q.	Are you an expert in fission reacto	or	
24		criticality analysis?		
25	Α.	For the purpose of this proceeding	, yes.	
		• • • • • • • • • • • • • • • • • • •		

ţ

1.	GORD	ON THOMPSON, PH.D.	PAGE	22
2				
3	Q.	On what basis do you state that?		
4	Α.	My contribution to the to this		
5		proceeding relies on my basic expe	rtise i	n
6		scientific principles and analytic		
7		principles and my general experien	ce with	1
8		engineering in general and nuclear	plant	
9		engineering in specifics.		
10	Q.	So when you assert that you're an	expert	
11	- - -	in fission reactor criticality ana	lysis,	
12		that would be in the general scien	tific	
13		principles attendant to criticalit	Υ?	
14	Α.	The brief that to which I will		
15		that my contribution to Orange	County	S
16		brief will rely upon expertise tha	tΙ	
17		possess.		
18	Q.	Could you answer my question?		
19		THE WITNESS: Could you read	it bac}	:?
20		(Thereupon, the question begin	nning d	n
21		page 21, line 10, was read by	the	
22		court reporter)		
23	Α.	Yes, and on the application of tho	se	
24		principles to the contention.		
25	Q.	Okay		
		• • •		
	<u> </u>			

ł

1	GORD	ON THOMPSON, PH.D.	PAGE	23
2				
3		Tell me what criticality anal	ysis	
4		codes you have run yourself.		
5	Α.	I have not run any, as such.		
6	Q.	Okay. Can you tell me what traini	ng	
7		you've had in running criticality	analysi	i s
8		codes?		
9	Α.	None.		
10	Q.	Okay. What codes are used to perf	orm	
11		fission reactor criticality analys	is?	
12	Α.	Codes that are identified in the C	P&L	
13		application and in the subsequent		
14		correspondence, response for the r	equest	
15		for additional information.		
16		I don't remember the names of	those	
17		codes. And I should say as a poin	t of	
18		clarification that I don't expect	to run	
19		or seek to have run any of those c	odes ir	1
20		connection with this proceeding.		
21	Q.	Okay, so you have not run any crit:	icality	7
22		analyses yourself for this proceed	ing?	
23	Α.	Correct, and do not anticipate doin	ng so c	r
24		having this done.		
25	Q.	Okay. Are you competent to evaluat	te the	

ŧ

1	GORD(	ON THOMPSON, PH.D.	PAGE	24
2				
3		results of a criticality analysis?		
4	Α.	Yes.		
5	Q.	If you've never been trained in run	nning	
6		the codes, have not run the codes		
7		yourself, how can you evaluate whe	ther th	ıe
8		analysis itself is correct?		
9	Α.	In evaluating an analysis, there as	re two	
10		primary aspects to the evaluation.	One i	. S
11		to given the assumptions on the	line	
12		analysis, to assess the analysis the	nat was	5
13		performed pursuant to those assumpt	tions.	
14		The other aspect is to examine the		
15		assumptions and assess whether thos	se	
16		assumptions are sufficient to addre	ess the	;
17		issues that might be of concern in		
18		connection with criticality.		
19		I in the course of this		
20		proceeding, I will expect to confin	ne my .	
21		assessment primarily and perhaps to	otally	
22		to the assessment of assumptions an	nd thei	r
23		adequacy.		
24	Q.	So you've identified two aspects he	ere.	×
25		The first one is sufficiency of the	Э	

1	GORDO	ON THOMPSON,	PH.D.		PAGE	25
2						
3		assumptions				
4	Α.	Right.				
5	Q.	second is	s given	those assur	mptions, the	е
6		analysis its	self.			
7	Α.	Correct.				
8	Q.	You believe	that yo	u're compe	tent to	
9		address the	suffici	ency of the	e	
10		assumptions;	; is tha	t correct?		
11	Α.	Yes.				
12	Q.	Do you have	the exp	ertise to	address the	
13		second part,	whethe	r given	those	
14		assumptions	are val	id, that t	he analysis	
15		done after :	it is in	fact corr	ect and	
1 6		valid?				
17	Α.	Not without	doing a	lot of st	udying. As	
18		of this mome	ent, no,	I am not	competent t	0
19		do that.				
20	Q.	Okay. Do yo	ou antic	ipate doin	g that?	
21	Α.	Not over the	e time f	rame of th	is	
22		proceeding.				
23	Q.	Okay.				
24		Dr. The	ompson,	are you li	censed as a	
25		nuclear powe	er plant	operator?		
			•			

1	GORD	ON THOMPSON, PH.D. PAGE 26
2		
3	Α.	No.
4	Q.	Have you ever been licensed as a nuclear
5		power plant operator?
6	Α.	No.
7	Q.	Have you been trained to operate a nuclear
8		power plant?
9	Α.	No.
10	Q.	Have you been an engineer at a nuclear
11		power plant?
12	Α.	No.
13	Q.	Have you ever implemented procedures at a
14		nuclear power plant?
15	Α.	No.
16	Q.	Have you ever written procedures for a
17		nuclear power plant?
18	Α.	No.
19	Q.	Have you ever worked at a nuclear power
20		plant?
21	Α.	No.
22	Q.	Are you an expert in nuclear power plant
23		operations?
24	Α.	No.
25		Let me let me correct that frame.
-		

(

Ш

1 GORDON THOMPSON, PH.D.

PAGE 27

	,	
2		
3		I have performed studies and presented
4		testimony relating to the safety of
5		nuclear facilities, including nuclear
6		power plants; and in the course of those
7		studies and preparing those testimonies, I
8		have become expert in operational matters
9		pertinent to the analyses and testimony.
10		So in that limited sense, I am an expert
11		in operations. It's a very circumscribed
12		sense.
13	Q.	Okay. Could you define what those areas
14		are that you got the limited expertise in?
15	Α.	Let's take the present proceeding and
16		Contention 2. I'm now familiar in a
17		general sense with the configuration of
18		the Harris Fuel Building and its
19		equipment, and in a general sense, with
20		the procedures used to manage fuel. I may
21		acquire additional knowledge on these
22	•	matters prior to the filing.
23	Q.	You say you're familiar in a general
24		sense.
25		MS. CURRAN: Excuse me. Before we go
	1	· ·

(

Į

1	GORD	ON THOMPSON, PH.D.	PAGE	28
2		· · ·		
3		on with the next question, I'd lik	e to	
4		take a short break.		
5		DR. HOLLAWAY: I'd like to fi	nish t	he
6		next couple questions that go dire	ctly t	0
7		the question that he just responde	d to a	nd
8		I'd be happy to take a break, if t	hat's	
9		okay.		
10		MS. CURRAN: Okay.		
11	Q.	You said you're familiar in a gene	ral	
12		sense with the equipment at the Ha	rris	
13		plant. What is that familiarity b	ased o	n?
14	Α.	Based on I think I said the fue	1	
15		handling building.		
16	Q.	Fuel handling building.		
17	Α.	To date, that's based on review of	the	
18		FSAR and other documents provided	by CP&	L
19		and deciphers of yesterday.		
20	Q.	Okay. When you state		
21	Α.	and		
22	Q.	Oh.		
23	Α.	Correction and with some additi	onal	
24		information obtained from the depo	sition	
25		yesterday of Mr. Devoe.		
		•		

ł

1	GORD	ON THOMPSON, PH.D.	PAGE	29
2				
3	Q.	Okay.		
4		You state you're familiar in a	a	
5		general sense with the procedures	for the	;
6		fuel handling building. What's that	at base	b.
7		on?		
8	A.	Again, the same data source that I	just	
9		described.		
10	Q.	Okay.		
11	Α.	Data set.		
12	Q.	Your familiarity is just in a gene:	ral	
13		sense, it is not from actual applie	cation?	)
14	A.	That's correct. Nor would I claim	to be	
15		familiar with all of the procedure:	s used	
16		in fuel management at Harris.		
17	Q.	Okay. And even the ones that you'	ve read	l
18		or heard about, you have not actual	11 y	
19		applied yourself.		
20	Α.	Correct, correct.		
21	Q.	Have you seen them applied?		
22	Α.	No.		
23	Q.	Okay.		
24		DR. HOLLAWAY: Diane, if you'd	l like	·
25		to take a break, it will be fine.		

1	GORDON THOMPSON, PH.D. PAGE 30
2	
3	MS. CURRAN: Okay.
4	DR. HOLLAWAY: How long do you want?
5	MS. CURRAN: Five minutes.
6	(Thereupon, a break was taken at
7	10:05 AM, with proceedings
8	recommencing at 10:12 AM)
9	THE WITNESS: I'd like to clarify one
10	of my previous statements. Is that okay?
11	DR. HOLLAWAY: Yes; go ahead.
12	THE WITNESS: You asked about my
13	expertise in nuclear plant operations.
14	DR. HOLLAWAY: Yes.
15	THE WITNESS: And I stated that I
16	have performed many studies and presented
17	numerous pieces of testimony pertaining to
18	the safety of nuclear facilities. This
19	goes back into the 1970's. So I've become
20	familiar with details of numerous
21	facilities, nuclear power plants and other
22	nuclear facilities, in several countries.
23	And I have always taken pains to acquire
24	the necessary familiarity with the details
25	of the design and operation of each

Į

1	GORDON THOMPSON, PH.D. PAGE 31	
2		
3	facility in order to support whatever	
4	claim I made in my study or testimony.	
5	DR. HOLLAWAY: Okay.	
6	THE WITNESS: And that's typically	
7	not the same as the as the level of	
8	operational familiarity that one would	
9	require as an operator or manager of such	
10	a facility. It's a sufficiency of	
11	knowledge and expertise to support	
12	whatever claim about safety is made in the	
13	study or testimony.	
14	And in this proceeding, I will expect	
15	to meet the same standard, that any claim	
16	that I make will be supported by	
17	sufficient expertise and familiarity with	
18	the design and procedures and operational	
19	characteristics of the Harris plant.	
20	DR. HOLLAWAY: Okay.	
21	Q. Your ability to speak on these issues I	
22	gather would depend on what the specific	
23	issue was?	
24	A. I yes, with the clarification that I	
25	have on various occasions become	
l		

í

1	GORDO	ON THOMPSON, PH.D.	PAGE	32
2				
3		acquired knowledge and expertise the	nat I	
4		didn't did not possess up to tha	at	
5		point		
6	Q.	Okay.		
7	Α.	in the realm of nuclear safety.		
8	Q.	Your familiarity with design and		
9		operations of a facility, outside o	of your	
10		description of time in the fuel har	ndling	
11		building, would be based on reports	s you'v	'e
12		read, documents you've read; is that	at	
13		correct?		
14	Α.	And on applications of general phys	sical	
15		principles.		
16	Q.	Okay. When you say "application of	f	
17		general physical principles," you'r	re	
18		talking about theoretical applicat:	ion, no	)t
19		physically doing things, is that co	orrect,	
20		yourself physically doing things?		
21	Α.	I yes.		
22	Q.	Okay. And you say your expertise w	would	
23		not be the same as an operator or n	manager	
24		of a nuclear power plant. I presur	me that	
25		would include workers, technicians	1	
		· · ·		

1	GORD	ON THOMPSON, PH.D.	PAGE	33
2				
3		et cetera that are actually workin	g at tł	ne
4		facility.		
5	Α.	Yes.		
6		Each each such person has	a	
7		particular realm of expertise, and	there	s
8		only so much you can do in one lif	e.	
9		But I emphasize that I'm alwa	ys very	ł
10		careful to support my claims and f	inding	5
11		with knowledge about the underlyin	g	
12		about relevant matters underlying	those	
13		findings.		
14	Q.	That's certainly laudable.		
15		How much time did you spend i	n the	
16	E .	Harris Fuel Handling Building?		
17	Α.	The site visit lasted about two ho	urs, I	
18		recall; so maybe an hour in the bu	ilding	•
19	Q.	Okay. Does that hour in the build	ing mal	ке
20		you an expert on the fuel handling		
21		building?		
22	Α.	It mostly confirmed the general		
23		understanding I obtained from the	FSAR.	
24	Q.	Okay; layout of where things were,		
25		et cetera.		
	•			

C

ł

•

1	GORD	ON THOMPSON, PH.D.	PAGE	34
2				
3	Α.	Right.		
4	Q.	Okay. Have you been in other fuel		
5		handling buildings at other facili	ties?	
6	A.	Darlington; Main Yankee; Dukovany;	and	
7		TMI, Unit 2.		
8	Q.	Where is the Darlington plant loca	ted?	
9	A.	Canada, in the province of Ontario	•	
10	Q.	Okay. Is that a pressurized water	reacto	or
11		like Harris?		
12	Α.	No.		
13	Q.	TMI, Unit 2; when were you there?		
14	Α.	In the '79-80 period. I don't reca	all	
15		exactly. 1 1980.		
16	Q.	It was after 1979.		
17	A.	Yeah.		
18	Q.	What type of reactor is Main Yanke	e?	
19	Α.	PW it I don't recall the ver	ndor.	
20	Q.	And what were you doing in the fue	1	
21		handling building there and for how	w long?	?
22	A.	It was a site visit in connection	with ar	r
23		intervention by the State of Maine	•	
24	Q.	What year was that?		
25	A.	I think 1981.		

Ĩ

1	GORD	ON THOMPSON, PH.D. PAGE 35
2		
3	Q.	How long were you in that fuel handling
4		.building?
5	Α.	Maybe an hour.
6	Q.	Dukovany; what type of reactor is that?
7	Α.	Czech Republic, for PWR units, Russian
8		design.
9	Q.	Russian design?
10	Α.	Soviet design.
11	Q.	Okay. Is there an acronym that that goes
12		by?
13	Α.	The the Russian for PWR is VVR.
14	Q.	VVR?
15	Α.	Any pressurized water reactor.
16	Q.	Okay.
17		What were you doing in the fuel
18		handling building there?
19	Α.	I was representing the investor, Vienna,
20		which in turn represented the Chancellor's
21		Office of Austria, which was concerned
22		about safety of fuel management at
23		Dukovany, which is a neighboring country.
24	Q.	What year were you there?
25	Α.	1992.

(

1	GORD	ON THOMPSON, PH.D.	PAGE	36
2				
3	Q.	How long were you in the fuel hand.	ling	
4		building?		
5	Α.	In about an hour.		
6	Q.	Okay.		
7		You mention that part of your		
8		expertise is based on sitting in or	n	
9		Mr. Devoe's deposition yesterday;	is that	5
10		correct?		
11	Α.	That's a contribution to it, yes.		
12	Q.	Okay.		
13	Α.	The contribution to my knowledge,	rather	
14		than expertise.		
15	Q.	Very good. How long were you in the	hat	
16		deposition?		
17	Α.	I'd guess about two hours.		
18	Q.	And did what you learned in Mr. De	voe's	
19		deposition substantially increase	your	
20		knowledge on these issues?		
21	Α.	No; it was a comparatively minor in	ncrease	9
22		in knowledge. There were lots of	loose	
23		ends left unresolved.		
24	Q.	Can you approximate, I guess		
25		percentage-wise? Is it, like, a f	ifty	

PAGE 37 GORDON THOMPSON, PH.D. 1 2 percent increase in knowledge? 3 4 Α. Oh, no; much less. One percent? 5 ο. 6 Α. Less. Less than one percent? 7 Q. Hard -- hard to say, but small. I --8 Α. 9 ο. Okay. I mean --It's not a matter that's susceptible to 10 Α. numerical estimate. 11 But it's less than fifty percent? 12 Q. Yes. 13 Α. Okay; less than twenty-five percent? 14 Q. Probably, but I wouldn't give a number on 15 Α. that. 16 17 Okay. 0. You have stated that you will address 18 and do understand assumptions that go into 19 20 criticality analysis. 21 Α. Correct. Okay. Even if you don't actually do the 22 Q. criticality analysis yourself ---23 Correct. 24 Α. -- the assumptions you can address. 25 0.

1	GORD	ON THOMPSON, PH.D.	PAGE	38
2				
3	Α.	Correct.		
4	Q.	Okay.		
5		Referring to your curriculum v	itae,	
6		which is a lot of pages, on page 1	it	
7		addresses sponsors and tasks.		
8	Α.	Correct.		
9	Q.	Aside from the Orange County, North		
10		Carolina, which I understand to be	the	
11		present proceeding, which of these	dealt	
12		with your evaluation of assumptions	used	
13		in criticality analysis?		
14	Α.	None of these so far.		
15	Q.	Okay.		
16		On page 4 your CV lists public	ations	
17		Aside from the first one, which is	this	
18		proceeding, which of these publicat	ions	
19		address assumptions used in critica	lity	
20		analysis?		
21	Α.	None so far.		
22	Q.	On page 8 there are expert presenta	tions	
23		and testimony?		
24	Α.	Correct.		·
25	Q.	Which of these address assumptions	used i	. n
