United States Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555

LaSalle County Station, Units 1 and 2  
Facility Operating License Nos. NPF-11 and NPF-18  
NRC Docket Nos. 50-373 and 50-374

Subject: Revised General Electric Nuclear Energy Reports, "Pressure Temperature Curves for ComEd LaSalle Unit 1" and "Pressure Temperature Curves for ComEd LaSalle Unit 2"

References: Letter from R. M. Krich (ComEd) to USNRC, Application for Amendment to Appendix A, Technical Specifications, Section 3/4.4.6, "Pressure/Temperature Limits, Reactor Coolant System," and Request for Exemption from 10 CFR 50.60, "Acceptance Criteria for Fracture Prevention Measures for Lightwater Nuclear Power Reactors for Normal Operation," dated February 29, 2000

Commonwealth Edison (ComEd) Company in Reference 1, proposed changes to Appendix A, Technical Specifications (TS), of Facility Operating Licenses Nos. NPF-11 and NPF-18. Specifically, we proposed changes to TS Section 3/4.4.6, "Pressure/Temperature Limits, Reactor Coolant System," and its associated Bases Section. In support of the proposed changes, two General Electric (GE) Company reports containing proprietary information were included.

The two GE reports have been revised to modify the proprietary markings and are included in Attachment A. We request the withholding of this information from disclosure, in accordance with 10 CFR 2.790(a)(4). The affidavits supporting this request are provided in the preface of each proprietary report. Additionally, non-proprietary versions of both reports have been prepared and are included in Attachment B. The GE reports included in this submittal are to replace the reports provided in Reference 1.
