Dear Sirs;

Once again I wish to express my appreciation for having accepted our request to meet with you on July 25th, and to permit us to present samples of our products, in order to complete our application process. Our purpose for this meeting was so we could provide you with more comprehensive information that would be conducive to the application for device registration.

We are conscious of the very commendable task you carry out in order to safeguard the public's health and well being in matters related to nuclear radiation. It is because of this high responsibility that we fully understand your careful analysis approach when it comes to approving device registration requests.

Please be reassured of Litepro's high respect for your work and of our intent to comply fully with all regulations and standards set out by the NRC. By doing so, we will strive to implement a product with real life saving potential.

We remain on standby for your further instructions.

Kind Regards,

Joe Tchira
