I am strongly against the transporting & storing of spent fuel rods in uath. the thought of having nuclear waste that close to me and my children sickens me! We already have the weapons depot in toole that they said was safe and they have had nothing but problems with it. If there was a problem on the reservation there would be no time to react to it and we would be dead! also if it being stored on the indian reservation who would be in charge of making sure it was safe.
again I do not want this in uath!!

thank you for your time ZACK
