Subject: Re-Submission of Intermediate Milestone 5708-771-760, Detailed Dilution
Analysis Related to Exposure Scenarios Involving Water Wells - Letter Report

Dear Mr. McCartin:

The purpose of this letter is to re-submit the letter report entitled Initial Assessment of Dilution Effects Induced by Water Well Pumping in the Amargosa Farms Area. The subject report was previously submitted to NRC to fulfil Intermediate Milestone 5708-771-760. As requested in your letter of November 20, 1997, we have revised the report to address the NRC programmatic and editorial comments. The NRC comments were helpful and improved the overall clarity of the report.

If you have any questions on this document, please contact me at (210) 522-3805 or Randy Fedors at (210) 522-6818.

Sincerely yours,

Robert G. Baca, Manager
