Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed License Amendments
"Revised Pressure/Temperature (P/T) Curves, and
Cold Overpressure Mitigation System (COMS) Setpoints:"
Correction of Reference Error

By letter L-2000-146, dated July 7, 2000, in accordance with 10 CFR §50.90, Florida Power and Light Company (FPL) requested that Appendix A of Facility Operating Licenses DPR-31 and DPR-41 for Turkey Point Units 3 and 4 be amended to extend the heatup, cooldown, and inservice test limitations for the Reactor Coolant System (RCS). Enclosure 3 to that letter was the Westinghouse report on Low Temperature Overpressure Protection System Setpoints, 32 and 48 Effective Full Power Years for Turkey Point Units 3 and 4. Reference #5 of that report was incorrect. The correct reference is as follows:

5. SE-ICAT(95)-223, Turkey Points Units 3 and 4 COMS Setpoint Evaluation, L. Sheffield, May 23, 1995, which transmits the results of calc. note CN-ICAT(94)-038, Rev. 0 and Rev. 1; and SE-ICAT(95)-341, IMP Data Error - Turkey Point Units 3 & 4 COMS Setpoint Evaluation at 20% Tube Plugging Conditions, L. Sheffield, August 18, 1995 which transmits the results of calc. note CN-ICAT(94)-038, Rev. 3. Note, there was no Rev. 2 of CN-ICAT(94)-038.

We apologize for any confusion. Should there be any questions on this correction, please contact Craig Mowrey at (305) 246-6204.

Very truly yours,

R. J. Hovey
Vice President
Turkey Point Plant
