AMENDMENT - 16
DETAILED DESCRIPTION

Prefix Page (as amended)	Group	Description	Page 1
II- 150	3	Revise the transformer oil content for CP2-EPTRMT-01 and CP2-EPTRMT-02 from 16,310 gallons to 16,384 gallons in Fire Zones 228 and 229. Revision The existing five coolers on each transformer contains a total of 224 gallons of transformer oil. The six new coolers for each transformer will contain a total of 318 gallons. The replacement with new coolers will result in an increase of 74 gallons of oil in each transformer. This will increase the total quantity of transformer oil in each transformer from 16,310 gallons to 16,384 gallons. The increase in combustible loading due to an slight increase in the quantity of transformer oil listed in Fire Zones 228 and 229 is insignificant. Fire zones 228 and 229 contains no safe shutdown components. The safe shutdown components are adequately separated from the transformer fire hazards by existing distance and/or barriers, and there is no impact to existing protections. This change does not impact the Fire Safe Shutdown Analysis. Change Request Number FP - 2,000 - 3 Related SER : 8.3 SSER : SER/SSER Impact N
