Comments: Please extend the October 16 deadline for the comment period about the generic 20-year extension granted to power plants. There should be no such extension ... we don't know what to do with the waste we've generated to this point.

The American public deserves to comment on this in an informed manner ... the NRC has held only ONE public meeting in Maryland, but this is a nationwide, even planetary, issue, and meetings should be held, announcements should be made in newspapers ... EVERYWHERE, at least in every region that has a nuclear power plant.

I'm disappointed in the NRC for trying to slide this one over on us. Please have more respect for the American people than this. Extend the comment period and let people know what's happening.

Thank you,
Rebecca Stevens
