Subject: Recycling radioactive waste

July 19, 2000
65 FR 44843
(6)

This has got to be the dumbest thing I have ever heard of. Does everyone there have a death wish for our children and grandchildren? It is bad enough that it will be thousands of years before we rid this planet of nuclear radioactivity produced through the bomb testing above and below ground. There are no "safe" levels. Now you want to authorize the recycling of nuclear waste! NO NO NO NO NO. I want my grandkids to see their grandkids grow up healthy.
