Comments: I **strongly** do not want the NRC to approve releasing radioactive soil in order to make money off the back end of the nuclear power industry. I do not endorse the theory that there can be minimal risk. I am outraged at the idea of another human being suggesting this experiment.

I will be discussing this with everyone I know. I'm sure you have heard the adage about a dissatisfied customer sharing their dissatisfaction with 10 times more people than a satisfied customer.

I have children and I hope that they and their own children do not have to restrict their movements around this earth in order to avoid the hot spots that were created in ill-advised capitalistic campaigns like this one.

Sincerely,

Melanie Sinclair
