Subject: Regarding your proposal to re-use "low-level" contaminated soils from nuclear reactors
I have but on

Regarding your proposal to re-use "low-level" contaminated soils from nuclear reactors I have but one comment - are you people crazy???

If you do this, I would hope that at the very least, places where the soil is "re-used" would be required to notify the unsuspecting public, so that those of us who prefer not to risk nuclear contamination might avoid it.
