

December 4, 2000

MEMORANDUM TO: File

FROM: L. Raynard Wharton, Project Manager, Section 2
Project Directorate IV & Decommissioning /RA/
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: TELEPHONE CONFERENCE WITH WESTINGHOUSE OWNERS
GROUP (WOG) REGARDING SPENT FUEL POOL BURNUP
REACTIVITY BIAS DISCREPANCY

On October 19, 2000, NRR Reactor Systems Branch (SRXB) staff conducted a telephone conference call with the Westinghouse Owners Group (WOG) and some of its members. The list of participants in the telephone conference call is attached. The WOG provided briefing information by facsimile to the staff. The briefing slides used for the discussion are available under ADAMS accession number ML003762210.

The WOG discussed WCAP-14416-NP-A, "Westinghouse Spent Fuel Rack Criticality Analysis Methodology," and the methodology for determining spent fuel criticality. The issue was related to potential non-conservative calculations in a WOG's member spent fuel rack criticality analysis and justifiable credits in the methodology. The WOG stated that the issue has been summarized in a Westinghouse Nuclear Safety Advisory Letter and that they would send a copy of the letter to the staff. After some discussion, it was agreed that the issue would be handled as a deficiency in accordance with Generic Letter (GL) 91-18, "Information to Licensees Regarding NRC Inspection Manual Section on Resolution of Degraded and Nonconforming Conditions."

Project No. 694
