---

Mr. Leftwich

On February 1, 2012, the U.S. Nuclear Regulatory Commission received the electronic submittal of Cameco Resources license renewal application for the Smith Ranch Highland in situ recovery (ISR) project in Wyoming. This email acknowledges receipt of the application.

The electronic version of the application is in the process of being added to the Agencywide Documents Access and Management System (ADAMS). The application will be made publicly available once it has been fully added to ADAMS and the staff completes its information security review. The staff will begin its acceptance review of the license renewal application on February 9, 2012. Once the acceptance review has been completed, the staff will initiate its detailed technical review.

If you have any questions, I can be reached at 301-415-0724 or by email at [douglas.mandeville@nrc.gov](mailto:douglas.mandeville@nrc.gov).

Sincerely,

Doug Mandeville
