SUBJECT: NRC Telecon Regarding Davis-Besse License Renewal

NRC Attendees: Sam Cuadrado de Jesus, Bo Pham, Allen Hiser,
Christopher Sydnor

FENOC Attendees: Cliff Custer, Larry Hinkle, Steven Dort, Allen McAllister,
Jake Hofelich, Zackary Warchol

This telephone conference call was initiated by Sam Cuadrado de Jesus, NRC Project Manager for Davis-Besse License Renewal. The telecon took place at 1:00 P.M. on January 24, 2012. The purpose of the call was to discuss the pressurized water reactor (PWR) Reactor Vessel Internals Program and how FENOC plans to implement MRP-227-A, "Materials Reliability Program: Pressurized Water Reactor Internals Inspection and Evaluation Guidelines (MRP-227-A)."

The staff wanted to know FENOC's plans to address any differences between MRP-227 and MRP-227-A.

FENOC responded that a review of MRP-227-A dated December 2011 against the previous version of MRP-227 dated December 2008 was in progress to identify any changes needed to the Davis-Besse PWR Reactor Vessel Internals (RVI) Program or to the aging management review (AMR) results provided in License Renewal Application (LRA) Table 3.1.2-2, "Aging Management Review Results - Reactor Vessel Internals." FENOC noted that, at a minimum, several changes are required to LRA Table 3.1.2-2.

The staff indicated that the reconciliation of the differences would become an open item and that the changes should be sent as soon as possible. The staff indicated the response should be tied to a previous RVI request for additional information (RAI). The staff is to provide the RAI number.

FENOC agreed to provide the response as soon as possible, but no later than the Davis-Besse Advisory Committee on Reactor Safeguards (ACRS) subcommittee meeting scheduled for April 10, 2012.

The staff requested that FENOC be very clear as to what has and what has not changed, and to identify what was reviewed.

There was no further discussion, and the call was concluded.
