**Subject:** Non-proprietary Margin Assessment Audit Report

Paul,

There are relatively small but important changes to make the Report non-proprietary. These are aimed at minimizing/eliminating plant-specific citations and downplaying current Proprietary declarations. (Calculation notes were labeled Proprietary, but the individual figures/tables are not considered proprietary.)

The following changes will result in the desired classification:

Figure 2-4: Change the parenthetical citation to "(Source: Figure 1 of Westinghouse Proprietary Calculation CN-LAM-11-23)" and delete the plant/cycle designation in the key (can replace with something nondescript)

Figure 2-5: Change the parenthetical citation to "(Based on ADAMS ML110940268)"

Figure 2-6: Change the parenthetical citation to "(Source: Westinghouse Audit)" and change label above figure to "Maximum Local Oxidation (MLO) for Group 5"

Figures 2-7 through 2-9, and Tables 2-1 through 2-3: Drop second parenthetical, and insert "Proprietary" in the first as "(Source: Westinghouse Proprietary Calculation CN-LIS-11-XX)"

The rationale for not eliminating plant names in Tables 2-2 and 2-3 is that limiting MLO information should be in UFSAR.

GC
