ROCK CORE LOG

PROJECT: Progress Energy Florida - COLA Investigation, Levy County Site LOCATION: 1723168.5 N, 458055.6 E (NAD83)

START: 3/11/2007

DESCRIPTION

DEPTH, TYPE, ORIENTATION, ROUGHNESS, PLANARITY, INFILLING MATERIAL AND THICKNESS, SURFACE STAINING, AND TIGHTNESS

167.5' - Fracture, 25 deg, rough, undulating,

168.2' - Fracture, 30 deg, rough, undulating,

168.45' - Fracture, 80 deg, rough, undulating, black stains on 15% of surface 168.65' - Fracture, 20 deg, rough, undulating

171.75-172.3' - Fracture zone, multiple small

172.55, 172.75, 172.8' - Bedding plane (3),

172.8-172.95' - Fracture, rough, "L" shaped

172.95-173.6' - Fracture zone or mechanical

173.85' - Mechanical break, rough,

174.25' - Fracture or mechanical break,

174.5-175.35' - Fracture zone, multiple

rough to smooth, undulating, multiple fractures, most appear horizontal

177.45-178.45' - Fracture zone, mostly

look like shatter cones at 177.80'

182.45' - Mechanical break, rough

176.45-177.45' - Fracture zone, horizontal,

horizontal fractures, mechanical breaks that

178.45-179.5' - Fracture zone or mechanical

179.5-180.35' - Fracture zone, 2 flat surfaces

182.75-183.05' - Fracture, 80 deg, vertical fracture, not separated, and does not extend

183.0-183.35' - Fracture zone, multiple

186.5' - Fracture zone, multiple broken

fragments smaller than 1.5", no defined

187.75-188.35' - Fracture, vertical, rough,

188.65-188.95' - Fracture, vertical, exhibits

very heavy solution erosion features and

infilling or plating of iron oxides creating a

191.5-191.9' - Fracture zone, numerous

192.15' - Fracture, 0-7 deg, rough, staining or

recrystallization on the face that is very rough

191.7' - Fracture, smooth, planar 191.9' - Fracture, slightly rough, planar, iron

192.55' - Fracture, 60 deg, rough,

undulating 188.35' - Fracture, rough, planar, iron

undulating, irregular, no fill

174.0' - Fracture, rough

171.6' - Fracture, 45 deg, rough
