RE: AMENDMENT 2 - Activities at Temporary Job Site Utilizing U.S. NRC
Radioactive Material License #06-30556-01 Amendment 04

Temporary Location: Former United Nuclear Corporation Naval Products
Manufacturing Facility, New Haven CT

Cabrera Services Inc. (CABRERA) is providing this written notification of its intent to utilize CABRERA Material License #06-30556-01 at a temporary job site. The attached information is an amendment to notification information previously transmitted to NRC on November 4, 2011 (Control No. 576332) and is provided as required by license condition 18A.

We trust that this information is sufficient to continue use of CABRERA material license #06-30556-01 Amendment 04 at the temporary job site. This license or reciprocity is currently in use at 4 other sites (CT, HI, NY, PA). No activity exceeding license limitations will be conducted. CABRERA will notify the Regional Administrator, U.S. Nuclear Regulatory Commission, within 30 days of termination of activities at this job site in keeping with license condition 18B.

If you should have any questions regarding this notification, please contact Henry W. Siegrist at CABRERA (860) 569-0095 (voice) or (860) 569-0277 (fax).

Sincerely,

Henry W. Siegrist, P.E., CHP
RSO, Corporate Health Physicist

FORMER UNITED NUCLEAR CORPORATION
NAVAL PRODUCTS MANUFACTURING FACILITY
NEW HAVEN, CT
(Amendment 2 February 2012
to Control No. 576322)**

Cabrera Services, Inc. (CABRERA) is providing a Final Status Survey Plan (FSSP) for the former United Naval Products located in New Haven Connecticut. The site was decontaminated and decommissioned during 1973 through 1976 when work was transferred to a new facility in Montville, CT.

This amendment 2 revises the completion date from February 29, 2012 to address emergent FSS work associated with elevated readings found on the site. The elevated readings were discovered during preparations to a planned laydown area supporting the original work at the site. Some possible chemical contamination with conditions potentially creating mixed waste are of concern. These require additional time and remediation. In addition, a number of drainage holes penetrating a concrete trench beneath the building show elevated soil concentrations above the DCGL. These drainage holes require additional investigation, characterization, and possible remediation to meet DCGL criteria.

No other changes are made by this amendment from the scope of work and notification as provided to the NRC by Cabrera notification, November 4, 2011, Control No. 576332.

This information is being transmitted to you as required by condition 18A of the Cabrera Materials License.

WORK SCHEDULE REVISION

CABRERA NRC Materials License (No. 06-30556-01) requirements, including previously submitted procedures, will be adhered to with respect to the duration of this work evolution. Radiological surveys of affected work areas, and decontamination of equipment used for the work effort will be conducted after completion of sampling activities to ensure the absence of radioactive contamination. These values are consistent with NRC Regulatory Guide 1.86.

Work within the scope of characterization, remediation, and FSS activity covered by this amendment is expected to continue through July 31, 2012. Current work activities set forth by the Cabrera Aug 1, 2011 notification (Control No. 575745), and the November 4, 2011 notification (Control No. 576332) continue but now terminate with the revised completion date of July 31, 2012.

Key project personnel and supporting information:

Mr. Rob Flowers – CABRERA Project Manager
Cabrera Services, Inc.
9413 Willow Grove Court
Chesterfield, VA 23832
Cell (804) 833-7948
