SUBJECT: APPLICATION FOR LICENSE RENEWAL, CONTROL NO. 576473

The Nuclear Regulatory Commission has received NRC Form 313 dated November 17, 2011, requesting renewal of License No. 50-29244-01 issued to EDGE Solutions, LLC. The request for renewal is incomplete since it did not contain the supporting documentation described in NUREG-1556, Volume 2, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Industrial Radiography Licenses." Please note that the status of this license was changed from "active" to "standby – no operations" on January 30, 2010, at your request. In accordance with 10 CFR 30.36(d), you need to request termination of this license when no principal activities have been conducted for a period of 24 months. This license has been in "standby – no operations" status for 24 months. At this moment you only have two options:

1. Submit a complete renewal application following NUREG-1556, Volume 2, and request that your license status be changed to "active" within thirty (30) days from the date of this notice, or
2. Submit NRC Form 314, "Certificate of Disposition of Materials", transfer all radioactive material to a licensed entity, and request termination of this license within thirty (30) days from the date of this notice. NRC Form 314 can be found at <http://www.nrc.gov/reading-rm/doc-collections/forms/>.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Roberto J. Torres, Senior Health Physicist
Nuclear Materials Safety Branch B
