Subject: FW: North Anna Meeting on seismic
Attachments: CAL for Perry 1986.docx

My answer at this point would be:

I would say that we are relying on the authority in 10 CFR Part 100, Appendix A, V.a.2, "Determination of operating basis earthquake:"

The Operating basis earthquake will specified by the applicant after considering the seismology and geology of the region surrounding the site. If vibratory ground motion exceeding that of the Operating Basis Earthquake occurs, shutdown of the nuclear plant will be required. Prior to resuming operations, the licensee will be required to demonstrate to the Commission that no functional damage has occurred to those features necessary for continued operation without undue risk to the health and safety of the public.

For the Perry 1986 earthquake, Region III issued a CAL. I retyped the basic text of the CAL, as in the Attachment.

I'll be there for the entire meeting, if possible. I'm concerned that we have the right technical folks there. What is the regulatory vehicle we're going to use to permit/deny restart?

Eric- I might be good if you good attend the beginning of the meeting to kick it off. We can prepare some opening remarks for you. I expect there will be lots of media. Your presence would show that we have senior mgt focus on the North Anna situation.

Guys -

D/94

I saw the attendee list. Should I attend? If so, should I sit at the conference table? My gut is to attend. Bob is a very experienced, senior PM, so I am very comfortable with him running the meeting and doing the PM thing. Please let me know what my role should be – thanks!

The licensee's email below forwards its list of attendees and key message for the meeting. Also attached is the Notice of the Meeting

I think OPA is issuing a Press Release.

Subject: meeting attendees and purpose

Bob,

The key message from the meeting is to provide the NRC with an overview of the event and describe our restart readiness demonstration plan.

This includes an overview of the event, discussion of the seismic monitoring equipment, walkdown and test plans- the results to date, and some longer term actions.

The folks from Dominion attending the meeting are US citizens with one exception:

Eugene Grecheck – Vice President – Nuclear Development
Nason Larry Lane – Vice President - North Anna Power Station
Freddy Mladen – Director Nuclear Safety and Licensing
Eric Hendrixson – Director Nuclear Engineering
Mark Walker – Manager Nuclear Engineering
Page Kemp – Project Manager
Divakar Bhargava – Principle Engineer – Engineering Mechanics (Permanent Resident)

John MacCrimmon – Supervisor Nuclear Engineering - Civil
Thomas Brookmire – Supervisor Nuclear Engineering – Nuclear Fuel Projects
David Sommers – Supervisor Nuclear Licensing
E. Thomas Shaub – Nuclear Licensing
Larry Lane, Site Vice President

Call if you need anything else.
