Reference: Docket No. 50-285

**Subject: Indefinite Delay in Extended Power Uprate for Fort Calhoun Station,
Unit No. 1 (TAC No. ME5104)**

The Omaha Public Power District (OPPD) has previously communicated its intention to apply for a 17% increase (i.e., 1500 megawatts thermal (MWt) to 1755 MWt) from the current licensed thermal power limit for Fort Calhoun Station, Unit No. 1. Due to current conditions, OPPD will not seek an extended power uprate at this time.

Please close TAC No. ME5104. Should OPPD decide to reinstate this project in the future, we will inform you at that time.

There are no regulatory commitments in this letter.

If you should have any questions, please contact Mr. Bill Hansher at (402) 533-6894.

Sincerely,

D. J. Bannister
Site Vice President and CNO
