Director, Office of Nuclear Reactor Regulation
Attention: Mr. D. M. Crutchfield, Chief
Operating Reactors Branch No. 5
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket No. 50-206
Seismic Analysis of Piping and Equipment
SEP Topic III-6, Seismic Design Considerations
San Onofre Nuclear Generating Station
Unit 1

Your letter dated February 1, 1983 forwarded for our review a copy of an analysis of the safety injection piping performed by EG&G Idaho for the NRC staff. We have reviewed this analysis and our comments are provided in Enclosure 1. As is apparent in the enclosure, these comments will have a significant effect on the conclusions of the EG&G analysis.

Your letter also requested copies of the latest seismic analysis reports of the charging and pressurizer spray system and diesel generator control cabinet. By copy of this letter, the analysis reports and microfiche of the computer output for the charging and pressurizer spray system are being provided to your consultant EG&G Idaho, Inc. Copies of the analysis reports are also provided for your information as Enclosure 2. The report for the diesel generator control cabinet will be provided by April 25, 1983.

If you have any questions on any of this information, please let us know.

Very truly yours,

RW Kruger for KP Baskin
