General Comment

To think about raising the limit during this age with cancer so relevant is beyond insane . What's the point in having rules and regulations in agencies if they're not in the people's best interest. The cancer epidemic is spread by many things however it's been scientifically proven that exposure to radiation is one of the biggest contributors .cancer attacks everyone from poor to the rich from my child to your children. Raising the limits is putting all of our children at jeopardy please take this into consideration.
