

# Industry Perspectives on Reactor Oversight Process

Regulatory Information Conference

March 14, 2001 – Session W2

Stephen D. Floyd

Senior Director, Regulatory Reform

# Program Successes

- Differentiates Performance Levels Among Plants
- Focuses Management Attention on Safety Significant Issues
- Emphasizes Role of Corrective Action Program in Achieving Plant Safety
- Provides Framework for Improving Dialogue Among Stakeholders

# Areas for Enhancement

- Improve Performance Indicators
  - Minimize Potential for Unintended Actions
  - Common Unavailability Definition
  
- Evaluate Frequency and Scope of Inspection Program to Improve Safety Focus or to Reduce Unnecessary Burden

# Areas for Enhancement

- Improve SDPs
  - Issue plant-specific reactor worksheets
  - Evaluate needed changes to ALARA SDP
  - Revise Security SDP when rule is revised
- Achieve consistency in implementation

# Future Industry Activities

- Issue revision to NEI 99-02
  - Incorporate Approved FAQs
  - Minor Clarifications
- Conduct June Workshop to Highlight Changes
- Manual Revision Effective for 3Q01 Data Gathering
- Continue FAQs and Pilot Process as Needed
