RIC 2004
License Renewal, Session T12

Exelon Perspectives

Fred Polaski

Exelon License Renewal Manager

Exelon Nuclear

March 11, 2004

Exelon Experience

- License Renewal Demo Project in 1996

- Peach Bottom

- Dresden / Quad Cities

- Oyster Creek

New Audit Process

- AMR Audits
  - Improved communications
- Other areas of the review
  - Scoping methodology
  - Scoping results
  - TLAAs

Regional Inspections

- Important part of the review process
- Coordination with NRR review
- Scoping inspection
- AMR inspection

Credit for Existing Programs

- GALL issued 2001
  - Most programs are consistent with exceptions
- GALL update in 2004
  - Should result in most components and aging management programs in GALL
- Other potential GALL improvements

Other Improvements

- Keep end product in sight
- Stay within accepted codes, standards, methods

Conclusions

- License Renewal Process has been successful
  - Industry and NRC working together
  - Efficiency, Consistency, Predictability
- Room for improvement
  - More streamlined
  - Take advantage of previous work
  - More standardized, without becoming too narrowly defined
