Regulatory Information Conference 2005

Session B2 – Safeguards / Security

Key Elements of Regulatory Stability

- Supplemented Design Basis Threat
- Security Plan Validation
- Integrated Response Initiatives
- Rulemaking

Supplemented Design Basis Threat

- Order issued April 29, 2003
- Threat environment under continuous review
- NRC follows systematic screening process

Security Plan Validation

- Comprehensive licensee training and exercises that validate protective strategies
- Regulatory performance assessments through rigorous and realistic NRC Force-on-Force exercises
- Comprehensive baseline inspection program and Significance Determination Process

Integrated Response Initiatives

- Close coordination with DHS and other Federal, State, and local agencies
- Awareness of and participation in initiatives
- Identification and implementation of mitigative measures
- National Infrastructure Protection Plan / National Response Plan

Rulemaking

- Part 26: Fitness for Duty and Worker Fatigue
- Part 73.1: Design Basis Threat
- Part 73.21: Requirements for Protection of Safeguards Information
- Part 73.55: Security / Physical Protection Requirements
