

# **REGIONAL ROLE IN THE NRC OPERATING EXPERIENCE PROGRAM**

**Marvin D. Sykes  
Performance Evaluation Branch  
Division of Reactor Safety  
Region I, NRC**

**Session F2: Operating Experience, RIC 2005**

*MARCH 8, 2005*

# Region's Role in the NRC's Operating Experience Program

- **Identify, Collect, and Evaluate OpE**
- **Provide Prompt Reviews of Incoming OpE**
- **Coordinate Response with Stakeholders**

# Identify, Collect and Evaluate OpE Information

- **Identify Reactor Safety Issues for OpE**
- **Provide Inspection Resources for Onsite Reviews of OpE**
- **Perform Independent Reviews of Licensee Actions**
- **Verify Implementation of Commitments Associated with OpE**

# Prompt Review of Incoming Operational Data

- **Multiple Sources of OpE Information**
- **Screening Guidelines**
  - **Quantitative Reviews**
    - **Conditional Core Damage Probability (CCDP)**
    - **Significance Determination Process (SDP)  $\geq$  WHITE**
  - **Qualitative Reviews**
    - **Degraded or Loss of Safety Function**
    - **Potential Generic Implications or Commonalities**
    - **New or Unexpected Failure Mode**

# Coordinate Response with Stakeholders

- **Timely Communication of OpE to Stakeholders**
- **Apply Lessons Learned from OpE**
- **Provide Feedback to NRR on Program Effectiveness**
