Doug G. Huyck

Doug Huyck began his career with the US Navy in the Naval Security Group which provided support to the National Security Agency on military intelligence matters.

Following a tour of duty with the US Navy, Doug Huyck worked nuclear security for over 22 years at two different power reactor sites during construction and licensed power operations. Doug held various security positions involving operations, training, supervision, and management which implemented the programs as required by 10 CFR Part 73.

Doug joined the USNRC in July 2003 and has worked in the Office of Nuclear Security Incident Response (NSIR), Divisions of Security Operations and Security Policy. Doug has held various staff positions in security oversight and security policy. In addition, Doug has assisted in baseline and special inspections of power reactor sites.

Currently, Doug is assigned as the Team Lead for New Reactor Security, which is responsible for security licensing infrastructure development and preparation for new reactor applications. In addition, Doug is the primary interface with internal and external stakeholders on security issues associated with new reactors.
