

Eileen McKenna has been an NRC employee for more than 28 years, in a variety of positions related to power reactor licensing. Her experience includes three years as Executive Assistant to Commissioner de Planque. In the last several years, she has been responsible for reactor-related rulemakings, first as a senior project manager, and subsequently in management positions. In April, she will assume a new position as Branch Chief for AP1000 Projects Branch 2 in the Office of New Reactors.

Prior to joining NRC, she received a Bachelors degree in mathematics from Mount Holyoke College, and worked for four years at the Bettis Atomic Power Laboratory.
