

**Harry Barrett**

Principal Engineer - Duke Energy Corporation

Harry Barrett is a Principal Engineer assigned to the Oconee Nuclear Station. Mr. Barrett is the Technical Lead for the Duke nuclear fleet for the NFPA-805 Transition Project. In support of the NFPA-805 Transition, he developed the overall test plan, supervised the test setup and provided technical oversight of a significant fire test program to determine the fire-induced spurious actuation probability for the armored cable used in the Duke nuclear fleet.
