

Dr. Ralph Meyer Biography

Ralph Meyer is the Senior Technical Advisor for Fuels Research in the NRC's Office of Nuclear Regulatory Research. He did his Ph.D. research on diffusion in metals, and subsequently did additional research on reactor fuel at Argonne National Laboratory. He joined the NRC many years ago and has always worked in the fuels area, both in NRR and RES. He is the author of numerous technical papers and NUREG reports, and has written fuel-related Reg. Guides and the fuels section of the Standard Review Plan.
