

Theodore J. Bowling
Bio

Ted Bowling has worked in the field of environmental assessments for 35 years. He began his career working on environmental reports for a variety of nuclear plants such as Wolf Creek, Cooper, Quad Cities and Kewaunee. During his career he has also worked on the high-level waste project, performed siting for USEC facilities, and briefly worked on the short-lived North Korean reactor project. He most recently coordinated the Environmental Report for the Mixed-Oxide Fuel Project. He is currently the environmental lead for Duke Energy's William S. Lee III Nuclear Station, a two unit AP1000 plant.
