

Mr. A. Randolph Blough has 33 years nuclear experience, including 27 years with NRC Region 1. His NRC experience includes over 20 years in NRC supervisory and management positions. In his current assignment as the Director of the Division of Reactor Safety, he manages specialized inspections of nuclear safety, security, and emergency preparedness at 26 commercial reactors on 17 sites in the northeastern United States. His staff is comprised of managers, inspectors, risk analysts, incident response specialists, and support staff. Before joining NRC, he was a nuclear submarine officer and had graduated from the U.S. Naval Academy.
