

Bruce Napier is a member of the Radiological Science and Engineering Group, Environmental Technology Directorate, Pacific Northwest National Laboratory.

**Education:**

Ph.D., Radiological Health Physics, Oregon State University, (Ongoing Doctoral Studies)

M.S., Nuclear Engineering, Kansas State University, 1977

B.S., Nuclear Engineering, Kansas State University, 1975

**Experience:**

Mr. Napier works with the development and operation of models concerned with the environmental transport of radiological and chemical contaminants. His professional experience includes mathematical modeling and calculation of effects to individuals and populations from releases of various contaminants to the environment, as well as management of specific projects.
