

Buzz Savage is the Director for Advanced Fuel Cycle R&D in the GNEP program within the Office of Nuclear Energy, US DOE. He has been involved in management of nuclear energy R&D programs at DOE as a federal employee and contractor for the past 16 years. Programs in which he has been involved included New Production Reactors, Advanced Light Water Reactors, Generation IV, Advanced Accelerator Applications and the Advanced Fuel Cycle Initiative. Prior to DOE Mr. Savage served 20 years in the nuclear Navy, operating and maintaining nuclear propulsion plants on nuclear powered cruisers and aircraft carriers. He is a graduate of the U.S. Naval Academy and holds an M.S. in Nuclear Physics from the U.S. Naval Postgraduate School.
